

- ① Cancer
- ② Method development
- ③ Patient Stratification
- ④ Clustering & stratification?
 - patients subtypes → obesity
 - ...
 - class
- ⑤ Organs → Brain
- ⑥ Trait prediction

Medical cond.:

- Cancer
- Obesity
- Alzheimer
- trait (hair color)

① Data comes from which field?
↳ clinical condition

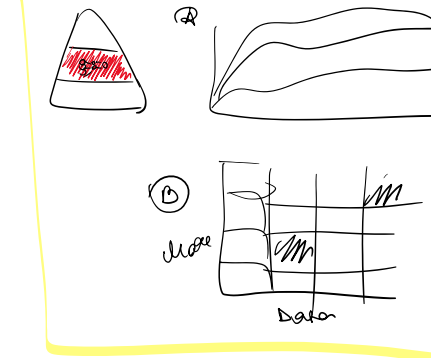

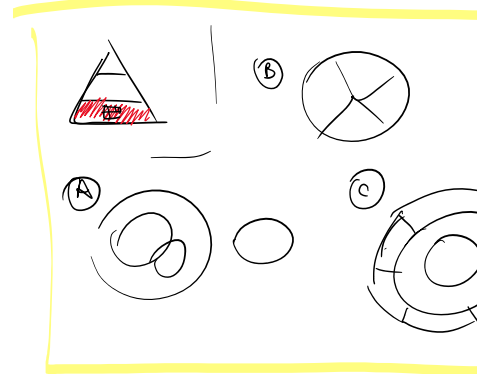

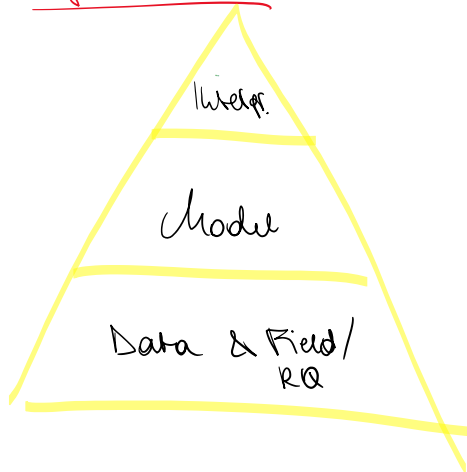

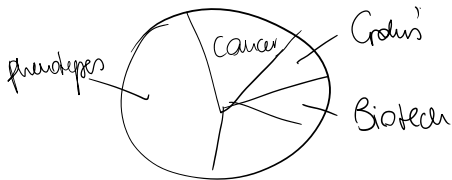

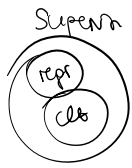

Of course we have biased towards Comp. Biology / Genomics in terms where from?

① Primary task:

- Clf
- Repr
- Clustering (unsupervised)

} Supervised

Origin of data?
